DAY OF PHOTONICS

21 OCTOBER 2016

leti

GET READY FOR THE NEXT EDITION OF DAY OF PHOTONICS

DAY OF PHOTONICS, initiated by EPIC, is a biennial global event that promotes “photonics” to the general public. Hundreds of companies, research organizations, and organizations involved in photonics reach out to their communities to raise awareness about what photonics is and why it is important.

On 21 October 1983, the General Conference of Weights And Measures adopted the value of 299,792.458 km/s for the speed of light. At the occasion of the anniversary, activities are organized around the world. Every company, research organization, university, school, student chapter, is invited to organize an activity, demonstration, or discussion on the impact of photonics in our day-to-day life.

www.day-of-photonics.org

►► *“It is our collective duty to actively promote Photonics technologies, explain what it is, and how it enables a wide range of products and services. Citizens, politicians, students, and industry at large, needs to be fully aware of the potential of photonics to tackle our most pressing societal challenges and the impact this has on our lives, business, and society.”*

Carlos Lee, Director General, EPIC – European Photonics Industry Consortium

Several hundred of activities are organized in more than 30 countries around the world...

Be part of it!

AFE welcomes students from Wood Green School in Witney, United Kingdom

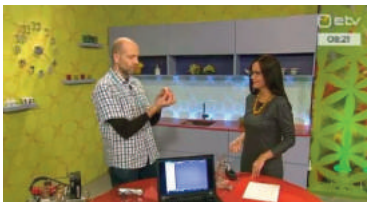

CPST in Lithuania organizes laser show

Center for Young Scientists, Pudak Scientific in Indonesia celebrates Day of Photonics

Australia National University enjoys specially designed cake for Day of Photonics

Estonia promotes Photonics on TEREVISIOON morning TV show

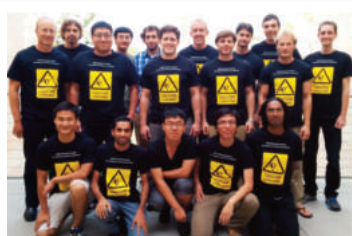

COBOLT in Sweden organizes open day

Bethlehem University in Palestine organizes outreach by Skype video call

Ghulam Ishaq Khan Institute of Technology in Pakistan discusses Photonics

UCSB in California USA gets together to celebrate Day of Photonics

OSA Student Chapter in Brazil at Instituto de Estudos Avançados

VTT from Finland publishes article in newspaper

SPIE Student Chapter in Ukraine (ILTPE NASU)

Berlin Stock Exchange Club introduces the potential of photonics applications

EBLANA in Ireland organizes staff meeting

Modulight in Finland organizes family day

Technical University in Vienna invites politicians to discover Photonics

OSA Student Chapter reaches out to high-school in Poland

Battle Abbey School in UK experiments with Photonics

National Technical University of Athens welcomes 4th grade school children

Students visit the Laser Zentrum Hannover in Germany
