

BALKAN PHYSICAL UNION

Office of the President

Sofia, BULGARIA

CONGRATULATION

To the participants in the International Conference on Physics education in high schools, 26-28.02.2016, Alexinac, Serbia

Dear participants, dear colleagues, dear Balkan physicists,

On behalf of the governance of Balkan Physical Union, as well as on behalf of the administrative council of the Union of the Bulgarian Physicists, please allow me to extend my sincere congratulations and best wishes to all of you!

Physics is not an easy subject for high school students, as we know. But riding a bicycle is not an easy task, either. However, when you master it, you feel a great pleasure! Same is with physics. You, dear colleagues teachers in physics, are supposed to convey this type of message to your students, schoolboys and school girls, in order to motivate them.

I believe your international meeting, as well as many regional meetings, Olympiads, competitions, held under the auspices of BPU, are of a great importance for our future generation, as young students and teachers enjoy riding together the winding road of physics.

Let Alexinac Conference be a great success!

Academician Alexander G Petrov

President of BPU and UPB
